Task: Team Members Web Page

Task Description:

The objective of this task is to design and implement a web page showcasing the member team of **VeriTech Software IT Service Pvt. Ltd.** Using HTML and CSS. This page contains departments wise details of VeriTech software team members like name and positions.

Step Taken:

1. **HTML Structure:**

   Created an HTML file with appropriate structure, including headings, paragraphs, and lists for organizing content.

   - Utilized semantic HTML elements to enhance accessibility and search engine optimization.

2. **CSS Styling:**
   - Developed a separate CSS file to style the web page.
   - Applied styles for layout, typography, colors, and spacing based on VeriTech's branding guidelines.

3. **Individual Member Sections:**
   - Created individual sections for each team member using the HTML file.
   - Structure each section to display the tea members' name, role, and bio, in visually appealing manner.

Challenges Faced:

1. **Limited Styling Options:**
   - HTML and CSS only approach posed limitations in terms of advanced styling features.
   - Overcame this challenge by focusing on clean and minimalist design principles.

2. **Maintaining Consistency:**
   - Ensuring consistent styling across different browsers presented a chanllenge.
   - Addressed this by testing and adjusting styles for compatibility with popular browsers.

Solutions Implemented:

1. **Simplified Design:**
   - Embraced a simple and elegant design approach to work within the constraints of HTML and CSS.
   - Prioritized readability and user experience over complex design elemens.

2. **Browser Compatibility Checks:**
   - Conducted thorough testing across multiple browsers to identify and address styling inconsistencies.
   - Adjusted CSS rules to ensure a uniform appearance across different browser environments.

Learnings:

1. **Effective Use of HTML and CSS:**
   - Gained a deeper understanding of utilizing HTML and CSS to create functional and visually appealing web pages.

Project Update:

The member team web page for Task – 1 successfully created using HTML and CSS.
